50X1-HUM

Professor laste Meduna  disease poliomyelitis is most uncommon in Hungary as well as in other s of central Europe. Consequently, very little polio research takes in Hungary.  the polio virus was very mild and perhaps no virile than the flu virus equently, the youth of the country develop an early immunity to this iction. Many Hungarian physicians have neither seen nor treated a le case of polic. No more than 20 clinically diagnosed cases of polic threatened.	X1-HUM .
